House of Aspirants

Punjab's bilingual exam-preparation platform

houseofaspirants.in

Welcome, Aspirant

Thank you for choosing **House of Aspirants**. These notes are written for every serious government-exam aspirant: **exam-oriented, easy to understand and free**.

> *"Prepared by someone who has already achieved what you are preparing for."*

HOW TO GET THE MOST FROM THESE NOTES

1 Read
Go through the chapter once and mark the points that are new to you.

2 Practise
Attempt this chapter's MCQ quiz on houseofaspirants.in.

3 Revise
Check previous year questions on the topic and revise your marked points.

Visit Our Website

- Bilingual notes: Punjabi & English
- Daily quiz & chapter-wise MCQs
- Monthly current affairs

CHAPTER 27

Microsoft PowerPoint

Computer Awareness

IN THIS CHAPTER

- Presentation window
- Slides and objects
- Ribbon tools
- Transitions and animations
- Presentation views
- File formats and shortcuts

- Text Left, Numbers Right

Microsoft PowerPoint (MS PowerPoint or PPT) is a presentation graphics software developed by Microsoft. It is used to create professional presentations in the form of slides.

PowerPoint helps users present information visually using:

- Text
- Images
- Audio
- Video
- Charts
- Animations
- Transitions

MS PowerPoint is a presentation software used to create, edit, organize, and display information through electronic slide shows.

Exam Point

Nature of MS PowerPoint = Presentation Graphics Software USES OF POWERPOINT

Education

- Classroom Teaching
- Seminars
- Projects

Business

- Meetings
- Sales Presentations
- Reports

Government & Organizations

- Training Programs
- Awareness Campaigns
- Data Presentation

BASIC TERMINOLOGY

Slide

A single page of a presentation.

Example

A presentation containing 20 pages is called a presentation having 20 slides.

Presentation

A collection of slides.

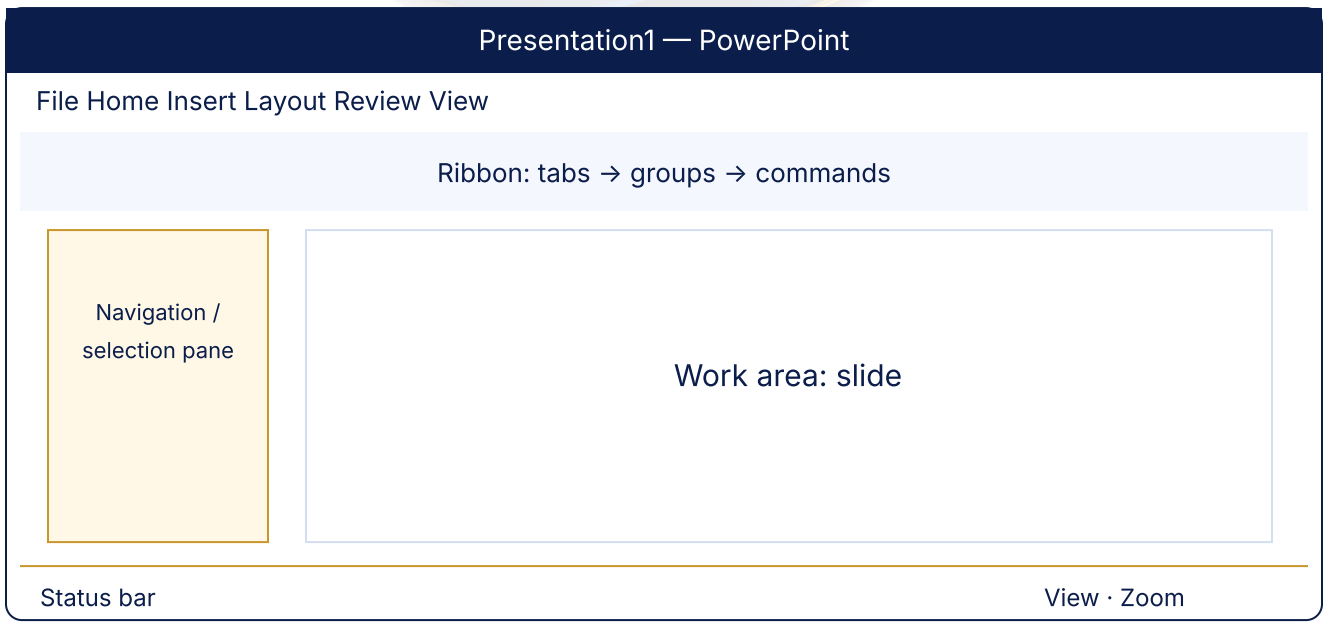

Presentation

- Slide 1
- Slide 2
- Slide 3
- Slide 4

Exam Point

Collection of Slides = Presentation

POWERPOINT WINDOW

Schematic window structure; exact controls vary by version.

IMPORTANT PARTS OF POWERPOINT

TITLE BAR

Displays:

- Presentation Name
- Application Name

Default File Name

Presentation1

SLIDES PANE

Displays all slides in thumbnail form.

SLIDE AREA

Main area where content is inserted.

NOTES PANE

Used for speaker notes.

RIBBON

Contains all tools and commands.

ZOOM SLIDER

Used to zoom in and zoom out.

Zoom Range :10% to 400%

POWERPOINT RIBBON TABS

PowerPoint

- Home
- Insert
- Design
- Transitions

- Animations
- Slide Show
- Review
- View

HOME TAB

The Home Tab contains the most frequently used commands. Home

- Clipboard
- Slides
- Font
- Paragraph
- Drawing
- Editing

The Home tab in Microsoft PowerPoint is the primary tab where most of the basic and frequently used commands are located. It is divided into several groups that help with slide creation, formatting, and organisation. Here's an overview of its main sections:

1.

Clipboard Group

Cut, Copy, Paste: Quickly move or duplicate content between slides.

Format Painter: Copy the formatting from one element and apply it to another.

2. Slides Group

New Slide: Insert a new slide into the presentation.

Layout: Change the layout of the selected slide (e.g., Title and Content, Two Content, Blank).

Reset and Section: Reset the layout to default or organise slides into sections. 3.

Font Group

Options to change font type, size, colour, bold, italic, underline, and text shadow.

Clear All Formatting option to remove any applied text formatting.

4. Paragraph Group

Bullets and Numbering: Add or customise lists.

Alignment: Align text left, centre, right, or justify.

Line Spacing and Indentation: Adjust spacing between lines and indent text.

Text Direction and Align Text: Rotate text or vertically align it.

5.

Drawing Group

Shapes: Insert shapes such as rectangles, circles, arrows, and more.

Quick Styles, Shape Fill, Shape Outline, Shape Effects: Customise the look of shapes.

Arrange: Control the order and alignment of objects on slides.

6. Editing Group

Find, Replace, Select: Quickly locate, replace, or select specific content or objects on slides.

INSERT TAB

Used to insert objects into slides.

Insert

- Tables
- Images
- Shapes
- SmartArt
- Charts
- Text
- Symbols
- Media

The Insert tab in Microsoft PowerPoint provides all the options needed to add different elements to your slides. This tab is essential for enhancing presentations with multimedia, graphics, and additional content. Below is an overview of the main groups and features found in the Insert tab:

1. Slides Group

- New Slide: Adds a new slide to your presentation, allowing you to choose from various

layouts.

2. Tables Group

- Table: Inserts a table to organise data in rows and columns directly on the slide.

3. Images Group

- Pictures: Insert images from your computer.
- Online Pictures: Add images from online sources.
- Screenshot: Capture and insert a screenshot into your slide.

4. Illustrations Group

- Shapes: Add rectangles, circles, arrows, flowchart elements, and more.
- Icons: Insert ready-made icons from the library.
- 3D Models: Include 3D objects for more dynamic visuals.
- SmartArt: Insert diagrams for processes, hierarchies, and relationships.
- Chart: Add graphs like bar, line, pie, and more for data visualisation.

5. Add-ins Group

- Get Add-ins: Install add-ins from Microsoft Store to extend PowerPoint's functionality.

6. Text Group

- Text Box: Draw an area to type custom text.
- Header & Footer: Add slide numbers, date, and footer information.
- WordArt: Insert stylised decorative text.
- Object: Embed external files like Excel sheets or PDFs.

7. Links Group

- Link: Add hyperlinks to slides, websites, or other files.
- Action: Create clickable hotspots that perform actions during the slideshow.

8. Comments Group

- Comment: Add notes or feedback for collaboration.

9. Media Group

- Video: Insert a video clip from your computer or online sources.
- Audio: Add background music or sound effects.

DESIGN TAB

Used to improve the appearance of presentations.

THEMES

A collection of:

- Colors
- Fonts
- Effects
- Background Styles

Exam Point

Themes provide ready-made presentation designs.

SLIDE SIZE

Used to change slide dimensions.

Common Sizes

- Standard (4:3)
- Widescreen (16:9)

TRANSITIONS TAB

Transition effects are applied to entire slides.

These effects appear when moving from one slide to another.

Exam Point

Transition = Effect between Slides

Preview Group

Used to preview transitions before applying them.

Timing Group

Used to control:

- Duration
- Sound
- Advance Slide

ANIMATIONS TAB

Animations are applied to objects inside a slide.

Examples

- Text
- Images
- Shapes
- Charts

Exam Point

Animation = Effect on Objects

Transition = Effect on Slides

TRANSITION VS ANIMATION

Transition	Animation
Applied to Slide	Applied to Objects
Between Slides	Within Slide
One Effect per Slide	Multiple Effects Possible

Transition → Slide

Animation → Object

SLIDE SHOW TAB

Used to present slides.

The Slide Show tab in Microsoft PowerPoint is dedicated to tools and options that help you present your slides effectively. It allows you to control how your presentation is displayed, rehearse timings, and set up custom shows. Here's an explanation of its main sections:

1. START SLIDE SHOW

From Beginning

Starts presentation from Slide 1.

Shortcut :F5

From Current Slide

Starts presentation from current slide.

Shortcut key :Shift + F5

Custom Slide Show

Allows you to create a personalised slide show with selected slides.

2. SET UP

Set Up Slide Show: Opens a dialog box to adjust settings like loop options, presented by a speaker, or viewed at a kiosk.

Hide Slide: Temporarily hides a slide from appearing during the presentation without deleting it.

3. MONITORS

Presenter View

Provides:

- Notes
- Timer
- Current Slide
- Next Slide Preview

Visible only to presenter.

Monitor Selection: Lets you choose which monitor displays the slide show if multiple screens are connected.

4. REHEARSE AND RECORD

Rehearse Timings: Lets you practise your presentation and automatically records the time spent on each slide.

Record Slide Show: Records narration, slide timings, and laser pointer movements for a self- running presentation.

REVIEW TAB

Used to review presentations.

Spelling

Checks spelling mistakes.

Research

Searches information online.

Thesaurus

Provides synonyms.

Example:

Good → Excellent

Translate

Converts text into another language.

Comments

Adds review comments.

Protect Presentation

Protects presentation using password.

Exam Point

Protect Presentation = Prevent unauthorized editing.

VIEW TAB

Used to change presentation views.

PRESENTATION VIEWS

PowerPoint provides five presentation views.

1. Normal View

Default view.

Used to create and edit slides.

Exam Point

Default View = Normal View

2. Outline View

Displays only text. Images and graphics are hidden.

Exam Point

Outline View shows text only.

3. Slide Sorter View

Displays all slides as thumbnails.

Used to rearrange slides.

4. Notes Page View

Displays slide with speaker notes.

5. Reading View

Runs the presentation in a window rather than using a full-screen slide show.

Useful for viewing a slide show while other windows remain available.

MASTER VIEWS

Master Views allow changes to multiple slides simultaneously.

1. Slide Master

Used to apply common formatting to all slides.

Example

Add company logo on every slide.

2. Handout Master

Used to customize printed handouts. 3. Notes Master

Used to apply common formatting to all notes pages.

SHOW GROUP

Used to show or hide:

- Ruler
- Gridlines
- Guides

ZOOM

Tools to adjust your view scale:

Allows you to set a custom zoom level.

Adjusts the slide to fit the PowerPoint window perfectly.

WINDOW

Options for working with multiple presentations:

Opens another window of the same presentation.

Tiles all open presentations for easy comparison.

Arranges open presentation windows for multitasking.

MACROS

A macro is code that automates actions. Modern PowerPoint supports VBA macros, but it has no built-in macro recorder.

Example

Formatting 50 slides automatically. Exam Point

Macro = Automation code (PowerPoint VBA; no modern built-in recorder)

SELECTION PANE

Displays all objects on a slide in separate layers.

Uses

- Select hidden objects
- Arrange objects
- Rename objects

IMPORTANT DEFAULT SETTINGS

Feature	Default Value
Default File Name	Presentation1
Default View	Normal View
Default Orientation	Landscape
Default Extension	.pptx
Default Slides	1 Slide
Zoom Range	10%–400%

FILE EXTENSIONS OF POWERPOINT

Presentation Files

Extension	Purpose
.ppt	Older Presentation
.pptx	Default Presentation
.pptm	Macro-enabled Presentation

Slide Show Files

Extension	Purpose
.pps	PowerPoint Show
.ppsx	PowerPoint Show
.ppsm	Macro-enabled Show

Template Files

Extension	Purpose
.pot	Template
.potx	Template
.potm	Macro-enabled Template

Other Extensions

Extension	Purpose
.ppa	Add-in
.ppam	Macro-enabled Add-in
.odp	OpenDocument Presentation
.svg	Scalable Vector Graphics
.wmf	Windows Metafile
.html	Web Page
.xps	XML Paper Specification
.thmx	Theme File

Exam Point

Default PowerPoint Extension = .pptx

Shortcut keys	Description
F5	To start slide show
Shift +f5	Start slide show from current slide
Ctrl + m	Add new slides
Ctrl + shift + d	To create duplicate slides
Ctrl +N	To open new presentation file
Ctrl + p	Print while editing; change pointer to pen during a slide show
Page down	Go to next slide
Page up	Go to previous slide
Home	Go to first slide
end	Go to last slide

Shortcut keys	Description
Ctrl +T	Open font dialog box
Ctrl + Q / Alt + F4	Close PowerPoint in Windows; availability can vary with version.
Ctrl + Plus (+)	Zoom in
Ctrl + Minus (-)	Zoom out
Ctrl. + o	Open presentation
Ctrl + s	Save presentation
Ctrl + D	Duplicate selected objects; in presentation-level shortcut context, behaviour depends on version and focus. Use Ctrl + W to close a file.
Ctrl +shift +c	Copy format of selected objects
Ctrl +shift +v	Paste format of selected object
alt+shift+c	Copy animation painter

Shortcut keys	Description
alt+shift+v	Paste animation painter
Ctrl + Space	Play or pause media when media has focus; during a slide show, Alt + P is also used.
Shift +left arrow	Select one character to the left
Ctrl + Shift + Right Arrow	Select to the end of the current or next word
Ctrl +right/left	To move cursor one word at a time
Home	To move the cursor to start of a line
End	End of line
Ctrl +home	Move cursor to Starting point of the slide
Ctrl +end	To ending point of slide
Ctrl+up/down	To move the cursor one paragraph up or down

Shortcut keys	Description
Shift + f3	to change case of selected text
Shift +f9	Show or hide gridlines
Ctrl +shift +tab	To switch between thumbnail and outline view
Alt + f5	Presenter view
ctrl +click on slide	Select more than one slide
F1	Help
F2	Edit text in a selected object
F12	Save as
Alt + n/x	To insert text box in slides
Alt +f9	To show or hide guide

Shortcut keys	Description
Ctrl +shift +F	Open Font dialog; in Selection pane use Ctrl + Shift + Up Arrow to move forward
Ctrl + Shift + Down Arrow	Move the selected item backward in the Selection pane
Ctrl + Q / Alt + F4	Close PowerPoint in Windows; availability can vary with version.
Ctrl +shift +s	Save As
Shift + right arrow	Select one character to the right
Ctrl +G	Used for grouping objects

MOST IMPORTANT EXAM FACTS

1.PowerPoint is Presentation Graphics Software.

2.Work is done on Slides.

3.Collection of Slides = Presentation. 4.Default file name = Presentation1.

5.Default view = Normal View.

6.Default extension = .pptx.

7.Default orientation = Landscape.

8.Transition is applied to Slides.

9.Animation is applied to Objects.

10.F5 starts Slide Show from beginning.

11.Shift + F5 starts Slide Show from current slide.

12.Rehearse Timings records presentation time.

13.Slide Master affects all slides.

14.PowerPoint supports audio and video.

15.Command to open PowerPoint = powerpnt.

QUICK REVISION NOTES

- PowerPoint = Presentation Software
- Work Area = Slides
- Default File = Presentation1
- Default Extension = .pptx
- Default View = Normal View
- Default Orientation = Landscape
- Home = Slides, Font, Drawing
- Insert = Tables, Images, Media
- Design = Themes, Slide Size
- Transition = Slide Effects
- Animation = Object Effects
- Slide Show = Present Slides
- Review = Spelling, Comments
- View = Normal, Outline, Slide Sorter
- Slide Master = Format All Slides
- F5 = Start Slide Show
- Shift + F5 = Current Slide Show
- PowerPoint supports Audio and Video

WORD VS EXCEL VS POWERPOINT

Feature	Word	Excel	PowerPoint
Nature	Word Processor	Spreadsheet	Presentation Software
Work Area	Pages	Sheets	Slides
Default File	Document1	Book1	Presentation1
Default Extension	.docx	.xlsx	.pptx

COMMANDS TO OPEN MS OFFICE APPLICATIONS

Application	Command
MS Word	winword
MS Excel	excel
MS PowerPoint	powerpnt

Exam Point

PowerPoint Command = powerpnt
